

Phantom 4 Pro/Pro+ V2.0 Release Notes

Date:	2019.12.25
Aircraft Firmware:	v01.00.50.00
Phantom 4 Pro V2.0 Remote Controller Firmware:	v01.00.50.00
Phantom 4 Pro+ V2.0 Remote Controller Firmware:	v01.00.04.00
DJI GO 4 App iOS:	v4.3.29
DJI GO 4 App Android:	v4.3.25

What 's New?

- Optimized flight controller parameters to improve flight experience.
- Optimized sensitivity of the shutter button of the remote controller to improve shooting experience.
- Optimized IQ and AWB parameters of camera to improve camera image quality.
- Fixed some issues.

Notes:

- Once the firmware is updated, it cannot revert to a previous version. Restart the aircraft and remote controller once the update is complete.
- If the firmware update fails, restart the aircraft, remote controller, and DJI GO 4 app, and try updating again.

Phantom 4 Pro/Pro+ V2.0 Release Notes

Date:	2018.10.24
Aircraft Firmware:	v01.00.22.00
Phantom 4 Pro V2.0 Remote Controller Firmware:	v01.00.22.00
Phantom 4 Pro+ V2.0 Remote Controller Firmware:	v01.00.01.00
DJI GO 4 App iOS:	v4.3.3
DJI GO 4 App Android:	v4.3.2

What 's New?

- Optimized the sensitivity of the remote controller's right stick when adjusting camera parameters.
- Fixed an issue where after restarting, the remote controller automatically reset to Mode 2 even if the remote controller was set in a different mode.

Notes:

- Once the firmware is updated, it cannot revert to a previous version. Restart the aircraft and remote controller once the update is complete.
- If the firmware update fails, restart the aircraft, remote controller, and DJI GO 4 app, and try updating again.

Phantom 4 Pro/Pro+ V2.0 Release Notes

Date:	2018.10.08
Aircraft Firmware:	v01.00.20.00
Phantom 4 Pro V2.0 Remote Controller Firmware:	v01.00.20.00
Phantom 4 Pro+ V2.0 Remote Controller Firmware:	v01.00.01.00
DJI GO 4 App iOS:	v4.3.2
DJI GO 4 App Android:	v4.3.0

What 's New?

- Added support for Ground Station Pro (GS Pro).
- Updated the video transmission system to OcuSync 2.0.
- Added support to connect two DJI Goggles through Multiuser Mode (Currently only available on iOS and requires DJI GO 4 v4.3.2 or above).
- Fixed an issue when moving the remote controller control sticks in Gain & Expo Tuning where the EXP value moved erratically.

Notes:

- When using the Phantom 4 Pro/Pro+ V2.0 with GS Pro, connect the remote controller to the PC before powering on the remote controller and the aircraft.
- Once the firmware is updated, it cannot revert to a previous version. Restart the aircraft and remote controller once the update is complete.
- If the firmware update fails, restart the aircraft, remote controller, and DJI GO 4 app, and try updating again.

Phantom 4 Pro/Pro+ V2.0 Release Notes

Date:	2018.06.26
Aircraft Firmware:	v01.00.15.00
Phantom 4 Pro V2.0 Remote Controller Firmware:	v01.00.15.00
Phantom 4 Pro+ V2.0 Remote Controller Firmware:	v01.00.01.00
DJI GO 4 App iOS:	v4.2.20
DJI GO 4 App Android:	v4.2.20

What 's New?

- Optimized compass calibration.
- Optimized gimbal performance to improve its stability during flight.

Notes:

- Once the firmware has been updated, it cannot be reverted to a previous version. Restart the aircraft and remote controller once the update is complete.
- If the firmware update fails, restart the aircraft, remote controller, and DJI GO 4 app/DJI Assistant 2, then try updating again.
